AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing Of Claims:

- 1.-5 (Canceled)
- 6. (New) A method for digital data transmission from a sensor to a control unit, comprising: dividing sensor values of the sensor for data transmission at different resolutions, the sensor values forming a first range of values including successive sensor values; and dividing the first range of values as a function of a variable relevant for the control unit.
- 7. (New) The method as recited in Claim 6, wherein:

the variable is a second range of sensor values for threshold values of a triggering algorithm for a restraining device, and

the sensor values in the second range of values are transmitted from the sensor to the control unit at a higher resolution.

- 8. (New) The method as recited in Claim 7, wherein the second range of values is selected from a lower half of the first range of values.
- 9. (New) The method as recited in Claim 6, wherein the method is executed by a transmitter module in the sensor.
- 10. (New) The method as recited in Claim 6, wherein the method is executed by a receiver module in a control unit.
